EDUCATION

American University of Beirut, Lebanon, Beirut — Aug 2025 – Aug 2026
- Cybersecurity Graduate Professional Diploma

University of Sharjah, Sharjah, UAE — Aug 2020 – May 2024
- *BS in Computer Science*
- *CGPA:* 3.35/4.0

TECHNICAL SKILLS

- *Languages:* JavaScript, Python, C++, PHP, HTML, CSS, Bash.
- *Tools & Frameworks:* React, Node.js, Laravel, Express.js, Three.js, Flask, PestPHP, RabbitMQ.
- *Databases:* MySQL, PostgreSQL, MongoDB.

WORK EXPERIENCE

University of Sharjah, *Part time Hardware Security Research Assistant*, Dubai, UAE. July 2026 - Present
- Identify hardware vulnerabilities and firmware exploit vectors to develop mitigation strategies.
- Conduct threat modeling for physical tampering, side-channel leaks, and reverse engineering.
- Test hardware security frameworks against simulated attacks and review research methodologies.

Technologies LLC, *Backend Developer Trainee*, Dubai, UAE. Apr 2025 - Jul 2025
- Developed RESTful APIs for e-commerce platforms and a notification microservice using RabbitMQ.
- Redesigned and optimized MySQL database schemas.
- Performed automated API testing with PestPHP.

CKR IT Consulting, *Software Developer Intern*, Dubai, UAE. Jun 2023 - Jul 2023
- Developed and demoed software that optimizes a workflow, reducing task completion time by 91% and eliminating human error.

University of Sharjah, *Full-stack Developer*, Sharjah, UAE Nov 2022 - Sep 2023
- Developed a website that imports Excel files into a database and enables data management and manipulation through a web interface.
- Built a website to handle 100,000+ records, featuring mass mailing, dynamic filtering, and data import/export for centralized database management.

PROJECTS

Retail Inventory and Sales System, *Full Stack Developer*
- Designed and built a complete retail web application, including the database schema, and system architecture, featuring CRUD operations for products, purchases, sales, and vendors using PostgreSQL, React, and Django.

Dynamic Object Recognition and Annotation (D.O.R.A), *Full Stack Developer (GitHub)*
- Developed a website using JavaScript, React, MongoDB, and Flask to optimize frame annotation time using AI-assisted techniques.

My Home Library, *Full Stack Developer*
- Developing a 3D home library application that recreates users' real-world bookshelves and helps them organize their personal book collections using React, React Three Fiber, Node.js, and PostgreSQL.
- Implemented user authentication, authorization, and book and bookshelf management.
- Integrated REST APIs and built dynamic bookshelf layouts with customizable arrangements and book positions.
- Planning social features for sharing bookshelves, writing book summaries, and rating books.
