EDUCATION

American University of Beirut, Lebanon, Beirut

Aug 2025 – Aug 2026

- Cybersecurity Graduate Professional Diploma

University of Sharjah, Sharjah, UAE

Aug 2020 – May 2024

- *BS in Computer Science*
- *CGPA: 3.35/4.0*

TECHNICAL SKILLS

- *Languages*: JavaScript, Python, C++, PHP, HTML, CSS, Bash.
- *Tools & Frameworks*: React, Node.js, Laravel, Express.js, Three.js, Flask, PestPHP, RabbitMQ.
- *Databases*: MySQL, PostgreSQL, MongoDB.

WORK EXPERIENCE

Technologies LLC, *Backend Developer Trainee*, Dubai, UAE.

Apr 2025 - Jul 2025

- Developed RESTful APIs for e-commerce platforms and a notification microservice using RabbitMQ.
- Performed automated API testing with PestPHP.

CKR IT Consulting, *Software Developer Intern*, Dubai, UAE.

Jun 2023 - Jul 2023

- Developed and demoed software that optimizes a workflow, reducing task completion time by 91% and eliminating human error.

Research Outreach Department at University of Sharjah, *Full-stack Developer*, Sharjah, UAE

Nov 2022 - Sep 2023

- Developed a website that imports Excel files into a database and enables data management and manipulation through a web interface.
- Built a website to handle 100,000+ records, featuring mass mailing, dynamic filtering, and data import/export for centralized database management.

PROJECTS

HRF Home, *Backend Developer* ([Website](#))

- Developed a RESTful backend APIs for admin and supplier dashboards using PHP Laravel.
- Redesigned and optimized MySQL database schemas.

SMN Food, *Backend Developer* ([Website](#))

- Developed a RESTful backend APIs for admin and supplier dashboards using PHP Laravel.
- Redesigned and optimized MySQL database schemas.

Dynamic Object Recognition and Annotation (D.O.R.A), *Full Stack Developer* ([GitHub](#))

- Developed a website using JavaScript, React, MongoDB, and Flask to optimize frame annotation time using AI-assisted techniques.

Trash Classifier, *Software Developer* ([GitHub](#))

- Built a computer vision-based trash classifier to identify and categorize waste types from captured images.
- Configured and programmed a Raspberry Pi with a camera module for image capture and processing.

My Home Library, *Full Stack Developer*

- Developing a 3D home library application that maps real-world book collections to virtual bookshelves using JavaScript, React, React Three Fiber, and Node.js.
